

# John Energy - Drilling Its Way To Global Success

**John Energy** could be used as a case study on the evolution of a drilling company. In 1984 this firm hailing from Gujarat, entered the water-well drilling business with a \$100 capital. In 1990 John energy bought its first workover rig and began a policy of steady

2,500 wells and drilled approximately 233,000 meters in the previous financial year.

John Energy has benefited from two key capital injections from Indian investment companies. The first, of \$11 million, came from Rare Enterprises in 2006, and the second, \$20 million from Sage Capital, came in April 2010. The money will help John Energy meet its goals of increasing its share of the off-shore services market and broadening its overseas presence. Joint ventures with foreign firms are also central to John Energy's strategy for acquiring new technologies. The company has already gained experience of horizontal drilling through its work with Canada's Atlantic Drilling, and its rigs are compatible with the latest technologies in this area. John Energy has established a strong-in-house training programme to develop its skills in the area of drilling and completion.

**Mahesh Vyas**  
Managing Director

expansion that has led to its current position as one of the leading drilling and workover service providers in India. Today the company operates 25 rigs and has a 15 percent share of the domestic onshore rig market.

John Energy supplied a custom-built workover skidding rig to work on the pad system employed by Cairn India in the country's western deserts. By 2010 the company had serviced more than

Fueling its overseas expansion, John energy sees potential in Africa, where the company already has business experience through its drilling activities. Having secured its contract in Algeria with exploration and production company Sonatrach, a government controlled firm, John-Energy is now looking at future opportunities throughout the African continent.
